

Installation instructions for OverDrive Media Console on the Kindle Fire to allow Kindle Fire owners to read titles only available in EPUB . Publishers sometimes choose not to make ebooks available to libraries in Kindle format.

- Go to the settings widget in the upper right corner it looks like a sprocket 
- Choose More  to get to Settings
- Scroll down to Device
- Choose Device
- Turn On the Allow Installation of Applications (from unknown sources)

- Go Home
- Choose Web from the Home Screen to open a browser window
- Type in <http://www.overdrive.com/software/omc/AndroidEULA.aspx>
- Agree at bottom of the page
- OverDrive Media Console will download to your Kindle Fire
- You'll see the download at the top of the screen it will end in .apk
- Touch it and allow the download to complete
- Open OverDrive Media Console and download and play the "welcome" message
- Select App Settings from the Menu at the bottom of the app. You'll need to create and/or put the Adobe ID and password you have in the settings of the OverDrive Media Console
- For simplicity's sake consider using the same information as you have for your Amazon account. That way you can remember your ID and password easily. If you need to go to the Adobe ID site to create a new Adobe ID
- Select the menu again and select "Get Books" and find the NC Digital Library by your zip code
- Add NCDL to the Media Console by touching the Star when you select your Davidson County Public Library.
- Visit NC Digital Library, sign in, and look for ebooks, for example the one that was available as an Adobe EPUB only that can be read in the OverDrive Media Console and not a Kindle Book.
- Once you have added NC Digital Library to the OverDrive Media Console when you touch Get Books you'll be able to select NCDL and go directly there.

Once the OverDrive Media Console app is installed and setup when you find an ebook that is only available as an EPUB, you'll be able to get it easily. You'll just click download for the EPUB on the NC Digital Library site and it will automatically transfer it there.
